OUTDOOR LIGHTING FIXTURES STYLE GUIDE

Presented below are a few of the most common fixture styles. All of the lighting hardware installed by Bentley Electronic Systems is solid brass, even the screws. They feature fittings and couplings designed to prevent dirt and debris from getting inside the fixtures, and they are completely weatherproof. In fact, several styles are created with the ability to "grow" with your landscaping! They will never rust, never corrode, and are FOREVER serviceable.

- **Bullet Light**-fixed or flex

- **Curved Niche Light**

- **Director Light**-can be mounted in-ground or in a tree

- **Lip Light**-mounted under a ledge to light the area below.
Great for railings and stairs

- **Marker Light**-in-ground, available in 90° or 180° with long or short throw distance

- **Matchlight**-perfect for pathways

- **Mushroom Light**-provides downlighting within plantings and along paths

- **Nose Light**-ideal for decks and stairways

- **Path Lights**

- **Tiki Torch**

- **Wall Light**-similar in style to the lip light, but mounted on/in the wall

- **Wash Light**-adds dramatic flair and brings light to dark areas

Clearly, excellent outdoor lighting does not rely on only one style of lighting fixture. Have Bentley Electronic Systems come to your home, hear your ideas, make suggestions, show you how the lighting will enhance YOUR outdoor areas, and develop a full plan and pricing.

No obligation. Call 860-657-8558 to schedule.
